Research (CDSER), School of Education,

Netaji Subhas Open University

and

Indian Association for Productivity, Quality &
Reliability (IAPQR), Kolkata

Venue: CDSER, SoE, NSOU ; CF-162, Sector-1
Salt Lake, Kolkata - 64

About the Course

Employability and Career Growth depend on several aspects like subject matter knowledge, presentation, communication and soft skills, innovative and 'out of box' thinking capabilities, ability to work in a team and other multi-disciplinary knowledge areas which a future employee and eventually a leader / manager will get exposed to and will need to not only perform but excel, in this competitive era. Growth of 'automation' and other 'smart systems' will reduce the 'traditional' job opportunities on one side and will give rise to 'new type of work' and 'new skill sets' requirement. Technology has emerged as a game-changer. Breakthroughs in Robotics, Artificial Intelligence, Internet of Things, 3D printing, driverless electric vehicles, mobility technologies, for example, have triggered a revolution that is expected to transform everyday human experience. This will necessitate today's job-seeking generation to have an 'open mind-set' and be acceptable to new technologies coming in their professional / work domain and be prepared to learn new skill sets, venture into new domains and have an innovative approach to tackle any challenge. The days of conventional / traditional 'thinking' are over.

This course has been designed keeping the above requirement in mind and will try to cover the areas of communication and soft skills, team building and interpersonal skills, innovation and entrepreneurship skills. In short, students will be exposed to various areas of general management which will help get them 'groomed and equipped' to face this rapid changing technological and sociological environment that the world is experiencing now.

The objectives and expectations from this course for the students would be for them to be able to:

- Identify and learn the basic skill requirements as they begin their professional journey
- Face job selection interviews with more confidence

- Improve on their written and spoken English capabilities
- Help them analyze and identify where they have their strengths and weaknesses
- Motivating them towards an engaging commitment to their project and their workplace
- Identify objectives, roles, responsibilities as they enter an organization and move through the ranks
- Become a 'team' player in their profession
- Bring out their maximum potential to achieve their best performances
- Provide leadership capabilities

About the Organizers:

Indian Association for Productivity, Quality & Reliability (IAPQR)

Indian Association for Productivity, Quality and Reliability as a National Body under the aegis of the University of Calcutta came into existence in late 1972. It has roughly 400 members representing industrial executives, R&D workers, college and university teachers, medical and agricultural scientists.

VISION AND MISSION

The Association is keenly interested in making some significant contribution to National Development by (1) enhancing the productive capabilities of workers at different levels, particularly at the middle and senior levels and (2) enabling the currently unemployed or under-employed individuals in securing gainful employment by imparting necessary knowledge and infusing required skills.
